FSD and Cyber Safety

Who is this Guy?

- Grew up in Fullerton, Rolling Hills Ladera Vista, graduated CSUF
- In industry for 28 years
- With FSD 18 years
- In charge of district network
- Do digital forensics investigations and data recovery and data destruction
- Father of 3 boys
- In my free time I repair computers, do data recovery and data destruction, digital forensics investigation, and play jazz guitar.

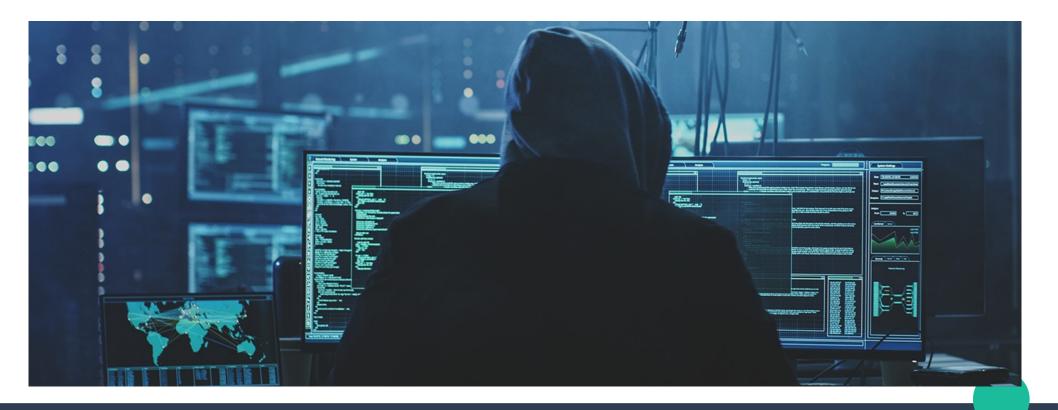

Securing Yourself

- Phishing and Popups.
- Poor password security.
- Out data systems.
- Lost Mobile devices and other accidental data loss.

- Sharing too much on social media.
- Not realizing you are a target!

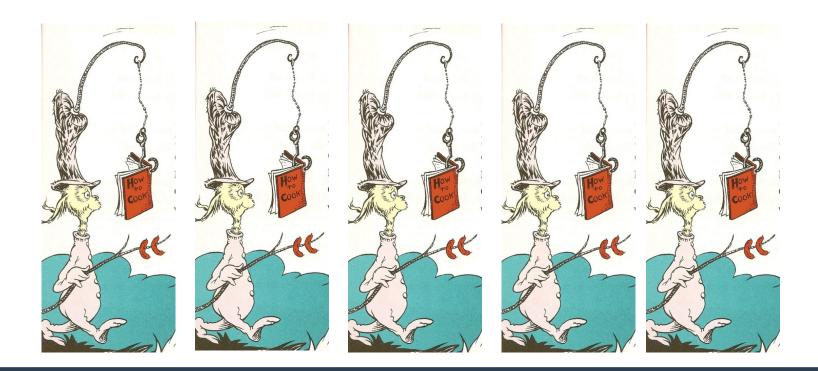

Hackers and More on the "Why"....

- Should you use "FREE" services?
- How hackers operate.
- Your data is the new currency, you should know how much your paying.

Phishing and Pop Ups

What to Look For Common Clues

- Message that creates a sense of urgency.
- It sounds too good to be true (no you did not just win the lottery)!
- Official organizations don't usually send messages full of grammatical errors and spelling mistakes
- Personal emails @gmail.com @yahoo.com @hotmail.com

What to Look For Common Clues cont.

- Message is generic "Dear Customer" "Dear NETFIX User" "Dear Wells Fargo Customer".
- No legitimate organization should request sensitive info over email (password, credit card or social security number).
- Message comes from someone you know but "something isn't right". From boss, co-worker, friend to gain trust.

Example Email

Dear Customer,

Unfortunately we unable to deliver your package this morning. We will be making two more attempts in the next 48 hours. If we are unable to deliver your package we will then have to return to sender. Please verify that your delivery address is correct by clicking on the link below, or updating the attached document.

Thank you, United Parcel Service

Example Email

NETFLIX

We're sorry to say goodbye

Hello,

iTunes let us know that you asked to cancel your membership. We've cancelled your membership effective Tuesday, March 21st, 2017.

Obviously we'd love to have you back. If you change your mind, simply <u>restart your membership</u> to enjoy all the best TV shows & movies without interruption.

RESTART MEMBERSHIP

We're here to help if you need it. Visit the <u>Help</u> <u>Center</u> for more info or <u>contact us</u>.

This account email has been sent to you as part of your Netflix

Securing Your Home Network

- Change default password on router.
- Always use WPA2 passwords.
- Know all your devices (baby monitors, game consoles, TV's and your car).

It's Tax Season. ..yay

Warning Signs of an Online Tax Scam:

- An email or link requesting personal and/or financial information, such as your name, social security number, bank or credit card account numbers, or any additional security-related information.
- Emails containing various forms of threats or consequences if no response is received, such as additional taxes or blocking access to your funds.
- Emails from the IRS or federal agencies. The IRS will not contact you via email.
- Emails containing exciting offers, tax refunds, incorrect spelling, grammar, or odd phrasing throughout.
- Emails discussing "changes to tax laws." These email scams typically include a downloadable document (usually in PDF format) that purports to explain the new tax laws. However, unbeknownst to many, these downloads are almost always populated with malware that, once downloaded, will infect your computer.

Other Good Habits For Staying Safe

- Keep your software up to date.
- If you share a device have separate accounts.
- Computer should have firewalls and antivirus.
- Before disposing of a device have it professionally wiped
- Use pins and pass codes.

Facebook fails to block \$35bn class action lawsuit over facial recognition

By E&T editorial staff

Published Monday, October 21, 2019

Facebook is facing a trial over its alleged misuse of users' facial recognition data, having failed to halt a class action lawsuit in its tracks.

The social media giant started scanning faces in photos in 2011 in order to provide photo tag suggestions, asking users if certain friends were included in newly-uploaded photos.

A class action lawsuit was filed against Facebook over the feature in 2015, alleging that citizens of Illinois did not consent to having their photos scanned with facial recognition software and were left unaware of how long the data would be retained. Under Illinois' Biometric Information Privacy Act, Facebook could face a fine of between \$1,000 and \$5,000 for each of its seven million Illinois-based users, with a maximum fine of \$35bn (many times higher than the

Scrades K-S Family Tips

Help Kids Post, Comment, and Upload Responsibly

As soon as you share the

first photo of your kid,

their own content or

you're establishing their

digital footprint. As kids get older and start creating

engaging with others online,

it's important for them to

they're leaving behind and

guide kids toward creating

the kind of footprint they

can be proud of.

what those tracks might reveal. Parents can help

understand the tracks

Check out these 4 tips 2

Be a role model. Before you post a photo of your kid on social media, ask if it's OK to share. Not only will you give them control over their own digital footprint, you'll also be showing them what you expect them to do with others' photos.

Use privacy settings.

Together, go through all the settings on new apps to make sure you both know what information your kids are sharing. Especially in the beginning, it's better to share very little.

3 Question everything.

Before you sign school forms or register for a new online service for your kid, check the privacy policy to see what kind of information you're giving the school or company and who they're sharing it with. Sharing some data might be required, but you may be able to opt out of others. Talk with your kid about why it's important to protect your personal data.

4 Use a celebrity as an example.

With older kids, choose a celebrity or another famous person and look through their Twitter or Instagram posts with your kid. Discuss your impressions of them based on what they post. Ask your kid what kind of image they'd like to project online.
